REBELLIONS ARE BUILT ON HOPE

WITNESS THE BEGINNING OF REBELLION

The *Andor* series will explore a new perspective from the *Star Wars* galaxy, focusing on *Cassian Andor's* journey to discover the difference he can make. The series brings forward the tale of the burgeoning rebellion against the Empire and how people and planets became involved. It's an era filled with danger, deception and intrigue where Cassian will embark on the path that is destined to turn him into a rebel hero.

The series marks the returns of *Diego Luna* as Cassian Andor and *Genevieve O'Reilly* as *Mon Mothma*. *Stellan Skarsgård*, *Adria Arjona*, *Denise Gough*, *Kyle Soller*, and *Fiona Shaw* also star.

Andor starts streaming exclusively on *Disney+* on *September 21*.

WELCOME TO WOOKEEPEPEDIA!

We are a *Star Wars* encyclopedia – created by fans, for fans. Our goal is to build the best resource about all things related to a universe a long time ago, in a galaxy far, far away.

Anyone can edit Wookieepedia! Whether you are here to **start editing** or to **chat with fellow users** you are welcome to **sign up** for an account!

What is Fandom?

The screenshot shows the Fandom website interface for the Cyberpunk Wiki. The page is for the character Lucyna Kushinada. The left sidebar contains navigation links for Fandom, Games, Anime, Movies, TV, Video, and News. The main content area has a header with the Cyberpunk Wiki logo and navigation tabs. Below the header, there's a section for 'In: Article stubs, Cyberpunk Edgerunners characters' and a title 'Lucyna Kushinada'. A 'Main' tab is selected. The main content area features a large image of Lucyna Kushinada with a warning box that says 'Look out, choom! Spoilers from Cyberpunk: Edgerunners to follow!'. Below this, there's a section for 'Lucyna Kushinada', more commonly known as just Lucy, is a netrunner and the deuteragonist of Cyberpunk: Edgerunners. A 'Contents' table of contents is visible, listing sections from Characteristics to References. The 'Characteristics' section is expanded, showing a description of Lucy as a mysterious netrunner from Night City. The 'Appearance' section is also expanded, describing her physical features. On the right side, there's a 'Biographical Information' table with fields for Alias(es), Age, Status, Home, Gender, Hair Color, Eye Color, Cyberware, and Equipment. The 'Physical Information' table is also visible, listing Gender, Hair Color, Eye Color, Cyberware, and Equipment. The background of the page features a large image of a city street at night with a large fire in the background.

- 3. Biography
 - 3.1. Early Life
 - 3.2. Life in Night City
- 4. Equipment
 - 4.1. Firearms
 - 4.2. Cyberware
- 5. Pre-Release
- 6. Notes
- 7. Trivia
- 8. References

Characteristics

Lucy is a mysterious netrunner from **Night City**. She is quite introverted and doesn't like to talk much about her past.^[d] Although she looks innocent, she won't hesitate to kill a person in a heartbeat if they tick her off.^[d] Lucy also considers Night City a prison and dreams of one day leaving it for the **moon**.^[d]

Appearance

Lucy is a young woman with naturally white hair and purple and red gradient pupils. She wears light red eye and lip makeuo. Her hair is cut in a **slit bob** - with her left side left longer - and dyed with a colorful pastel rainbow gradient.

Biographical Information

Alias(es)	Lucy

Why Ory/Kratos?

- * **Focused on Open Source**
- * **Experience in authentication**
- * **Projects are constantly evolving**
- * **Responsiveness**
- * **Lightweight**
- * **Can be deployed to private k8s cluster**
- * **Frontend agnostic and easily extensible**

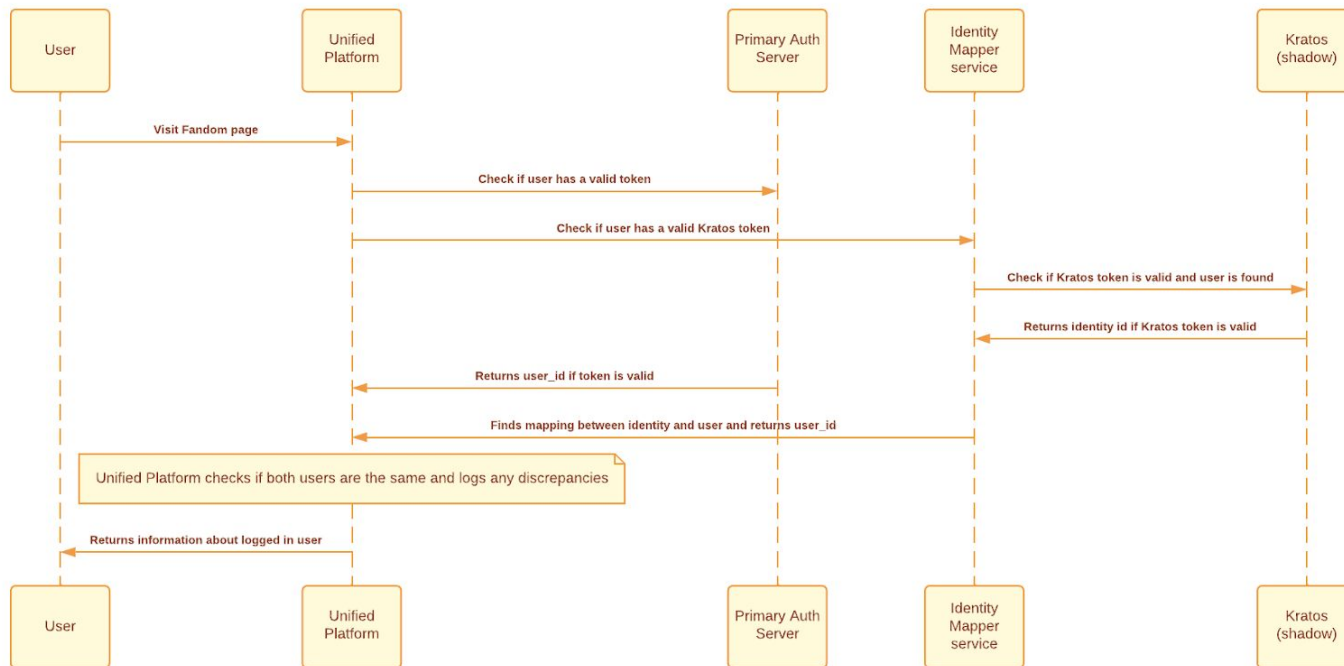

Performance and scalability

- * 35M registered users is quite a lot
- * 300M+ unique users visiting us monthly is challenging
- * Unified Community Platform and our companion services adds complexity
- * How to prove if new solution will handle our traffic?

The Solution

*

Run authentication services in shadow mode

Data constraints and data consistency

*

Keep identities in sync during migration to the new system

*

Some processes have to run on both systems (RTBF, user rename, password change)

How?

Webhooks and robust API

Data constraints and data consistency

*

Username constraints must be identical

How?

Blocking Webhooks
