MAKING PUBLIC DATA MEANINGFUL

Earliest fact-checking initiative from India

Leading Data Journalism firm from India

6K stories

4K Fact-check stories

1.6K videos

1K Misinformation debunking videos

Signatory of the IFCN

Partner of Facebook's 3rd party fact-checking

Open Data & Data Journalism trainings

Research & Technology

FAC7LY LABS

DEMOCRATIZE JOURNALISM TECHNOLOGY

VIDCHECK
Open Source platform for video Fact Checks

DEGA
Open Source Publishing platform

BINDU
Open Source Data Visualization platform

IMAGEMONK
Open Source platform for image automation

Mand
Open Source E-commerce platform for datasets

KAVACH
Open Source Identity Platform

FEATURES

- Multitenancy
- User Management
- Application Management
- Social Login
- Multi Factor Authentication
- Docker & Kubernetes support
- Support for Zero Trust Security

CHALLENGE

Implement a scalable Identity platform that natively manages security for multiple cloud-based applications within the organization. Follow the industry standard security best practices.

SOLUTION

Implement Zero Trust Security using Oathkeeper & user/organization/application management using Kavach. Kavach users Kratos for Identity & User Management and Keto for access control policies.

DEMO

ROADMAP

- Upgrade to the latest version of Kratos
- Implement Multi Factor Authentication
- Update Helm chart for installation
- Documentation website
